

### 8.6.4 NRCS Dimensionless Unit Hydrograph

Developed from  
 $A < 25 \text{ mi}^2$   
 NRCS has used it  
 for areas 100-200  
 $\text{mi}^2$  but  $< 50 \text{ mi}^2$

**Figure 8.11** Either the triangular or curvilinear version of the NRCS dimensionless unit hydrograph is combined with Eqs. 8.38-8.40.
