Asunto: FW: CWR5305-SH-F2022: Lecture 08232022 Highlights

Hello everyone,

Please find a list of highlights that we covered in our lecture yesterday, as follows:

1. Our course website is now operational. As an example, files of our draft Syllabus and Project Guidelines are now downloadable from the folder "Syllabus and Project". Information will be added as we make progress in our course program. Please review the files of our draft syllabus and project guidelines and share with me any questions or comments (i.e., typos, time, and deadlines, etc.) by Monday, August 29, 2022, via email.
2. You may start with your review of Chapters 1, 2 and 3 (i.e., background knowledge).
3. Chapters 12 and 13 are however first priority for your review in preparation for our coming two lectures on Tuesday, August 30, 2022. As each one of you read (i.e., tour) each one of those chapters, prepare 5 questions of your choice, one question from the content of each section in each chapter (i.e., 12.1, 12.2, 12.3, 12.4 and 12.5 and 13.1, 13.2, 13.3, 13.4, and 13.5). On Tuesday, you will meet in teams (to be assigned on that day) and address all those questions. Our first lecture will focus on Chapter 12; you will take an individual quiz at the end. Our second lecture will focus Chapter 13; you will take a team quiz at the end.
4. Homework Sets Nos. 1, 2 and 3 will be graded separately (i.e., over 100 points each). Hard copies of all 3 homework sets are due on **Thursday, September 22 or best earlier** as you complete each one of them. They include the following textbook problems:

HW No. 1:

1.9, 1.14, 1.24(a), 1.27

HW No. 2

2.1, 2.7, 2.29, 2.30, 2.34(a)

HW No. 3:

3.3, 3.4, 3.8, 3.19, 3.29

Cordially,

HRF

Professor
